STERISIMPLE™

Reprocessing. Simplified.

General Information

Reprocessing. Simplified.

SteriSimple was created by a practicing dentist for use by dentists. We know the work you do each day and the value you place on your time.
SteriSimple is complete system of digital documentation of each step of instrument reprocessing in dental practice.

This approach provides a comprehensive, complete solutuion to the labour-intensive demands of instrument reprocessing, instrument use and instrument recall. Every step of the way is thoroughly addressed and is nearly effortless.

We've all improved the way we reprocess our instruments. It's time to consider how to make our workflow less stressful while being more accurate and more efficient.

# STERI*SIMPLE*™

STERI*SPORE*™

Spore test recording

There are two versions. One version reads the 3M Attest Auto-reader 390 or 490. The other version is for use with regular spore incubators.

Auto saves and organizes a complete report.

Merges the daily report with summaries from STERI*READER*.

Auto-triggers a recall report should a spore test fail.

STERI*READER*™

Cycle logging and label production

Direct-to-computer logging of up to 10 sterilizers at once.

No data loggers, SD cards or USBs are needed.

QR coded labels are produced for each item per load.

Compatible with nearly every tabletop autoclave in use today.

You no longer need to write anything, anywhere.

User interaction per load is *seconds*.

STERI*RECALL*™

Instrument tracking and recall

Link an instrument to a patient by scanning the QR code produced by STERI*READER*.

Date entry is effortless.

No more pollution of patient charts with hand-written or typed cycle data.

Encrypted database may be searched in several ways, instantly.

Produces and saves a daily instrument usage report.

Integrate with your existing office management software, if compatible.

Reprocessing.
Simplified.

There is still confusion and worry regarding IPAC in dentistry. SteriSimple was produced in consultation with the the Ministry of Health and provided you with a simple, thorough solution. We are here to help not only with solutions but resources as well.

We keep an active Facebook page where we are asked and discuss numerous IPAC related questions. Also, please see our website for the following:

Videos
See information regarding cost analyses, BI and recall flowcharts, risk assessments. Find out how you can make large savings by changing to a short duration spore.
IPAC Calculator
This is a dynamic calculator you can use. Change variables and instantly learn how much you may be spending in labour costs for your instrument reprocessing. This was produced using cost analyses referenced in the Video section of the website.

Mr WHMIS
Use this free-to-use software for updated WHMIS label production. With the way the Ministry of Health came down on dentistry, the last thing we want is the Ministry of Labour to do the same. This software will produce new GHS WHMIS labels, which are compliant with the new WHMIS 2015 regulations. This is important information that we need in our practices.

Offices who have implimented SteriSimple into their workflow have reported several positive improvements. Here is a testimonial from a very happy office who recently started using SteriSimple:

"After many frustrating months navigating and complying with IPAC requirements, our support staff was becoming overwhelmed with never ending logging and labeling. We were even considering hiring an additional employee to alleviate the agony of sterilization. We were so relieved we found SteriSimple! Since then, we've reduced the time and costs of logging manually exponentially. It is an asset to our business to have our staff out of sterilization and tending to their many other duties, and more importantly, back with our patients. It is so easy to use and we feel secure knowing the pertinent information is preserved in one easy to access area with only a few clicks. Not only do we love it, but we've received many regards from patients who have noticed the QR codes and appreciate our efforts in remaining current with best practices. Additionally, what a bonus to be working with a Canadian Company!"

Save Time
SteriSimple has been proven to save time in your practice, which you can devote to more rewarding, productive tasks.

Reduce Overhead
SteriSimple has been proven to reduce overhead. Use our **IPAC Calculator** on our website to see how much you spend (and can save) during reprocessing.

Improve Morale
Offices using SteriSimple have enjoyed a clear improvement in morale.

Reduce your overhead.
Reduce your stress and frustration.
Simplify your instrument reprocessing.
